

PROTECTIVE TUBULAR NETS

It often happens that surfaces of objects are destroyed during transport or dispatch. There is a very simple solution to avoid this type of problem. The Novmax company has for years specialized in the production of protective net sleeves that provide effective protection. They are produced from high quality polyethylene which is characterized by high mechanical strength, impact resistance and good plastic properties. Such nets are used successfully in industry, transport and retail.

FLEXIBILITY, AESTHETIC VALUE and **STRENGTH** distinguish them from other brands.

APPLICATION

Protection of machine elements and filters

Our net sleeves provide protection of machine components and tools during transport, handling and dispatch. Protective net sleeves with thickness are perfect to the protection of heavy and large objects as well as filtering elements in filters.

Highly recommended: WS 10/10/12o, WS 25/24/30y, WS 25/24/40y, WS 25/18/25v, WS 50/42/50r, 100/100/114o

Protection of furniture

The structure of net sleeves ensures successful protection of furniture elements during their transport and storage, especially in the case of chrome and painted surfaces that are exposed. Moreover, they are highly elastic which adapts perfectly to the most irregular forms, (providing snug protection).

Highly recommended: 18/30/15, WS 18/36/11, WS 15/18/20B

Protection of bottles

Tubular nets are also used to protect glassware and bottles during transportation. The protective sleeves allow to safe products by every little unexpected impact through their manufacture, storage and transport. The sleeves provide protection against unexpected impacts during the manufacturing, storage, transport and process.

Highly recommended: WS-50 (WSB)

Protection of sanitary ware etc.

The protective net sleeves can be used to protect sanitary ware, kitchen fittings from damage or breakage during transport or in storage before sale. A special sleeve design provides good flexibility and sufficient adhesion to protect the goods.

Highly recommended: T-500, T-600, T-1001, T-3200, T-4250

Protection of gas cylinder and fire extinguishers

Plastic net sleeves wrap around tanks such as gas cylinders and fire extinguishers which creates a protective layer to protect them from damage during storage or transport.

Highly recommended: WS300/100/90g, WS300/100/65n, WS 200/100/135n, WS260/76/59n

Dispenser-box

Dispenser boxes can be supplied with our nets to aid dispensing. They provide a quick and easy way to unwind and cut our nets to the desired length.

Moreover, the dispenser boxes protect against dirt, dust and light.

PROTECTIVE TUBULAR NETS OVERVIEW

You can order **Novmax** protection nets either as rolls, reel or ready-cut according to your requirement.

All nets on the list **I** and **II** are available on stock. Delivery time: 2 to 21 days. List **III** presents the protective sleeves which can be produced upon customer's request.

Should you have any questions, our specialists from the customer service department are at your disposal.
